MUHAMMAD AUWAL ALIYU

AI Systems Engineer & Full-Stack Developer

Jos, Plateau State, Nigeria | 08064753943 | aliyumuhammadauwal92@gmail.com
LinkedIn: Muhammad Auwal Aliyu | GitHub: https://github.com/MaAbumusAb

PROFESSIONAL SUMMARY

AI Systems Developer and Computer Science graduate focused on applying artificial intelligence to practical challenges. Experienced in building machine-learning solutions, working with large language models, and developing offline-first systems for resource-constrained environments. Combines deep expertise in multi-agent frameworks, quantized local LLMs, and robust backend architectures (FastAPI, PostgreSQL, Docker) to deliver production-ready AI applications. Proven leadership in technology community building, product strategy, and technical mentorship.

TECHNICAL SKILLS

- **Artificial Intelligence:** Large Language Model (LLM) integration, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Model quantization, Prompt engineering, Speech Recognition (N-ATLAS), Qwen models, Scikit-learn.
- **Languages:** Python, JavaScript/TypeScript, C++, PHP.
- **Frameworks & Libraries:** FastAPI, Node.js, NestJS, React, Django, Flask, Laravel, Flutter, Streamlit, Pandas, Tailwind CSS.
- **Databases & DevOps:** PostgreSQL, MySQL, SQLite, Firebase, Docker, Git/GitHub.

PROFESSIONAL EXPERIENCE

Asabiyyah Technologies Ltd. Jos, Nigeria
Co-Founder & CEO

- Leading the strategic direction, product vision, and technical architecture of **Dila** (formerly Adashe), an offline-first, multilingual community fintech platform digitizing traditional ROSCA (esusu/ajo) savings groups.
- Engineered a zero-dependency architecture utilizing SQLite for robust double-entry ledger tracking, custom printed QR collection posters, and automated scheduling on edge devices.
- Spearheading business development and funding initiatives, including piloting a hybrid B2G SaaS model with subscription fees and transaction commissions.

AMTIC Enterprises Babura, Jigawa State
Founder & CEO

- Leading a digital enterprise focused on technology-driven services, ICT training, and document formatting solutions.

Amana Academy Jos, Nigeria
ICT Laboratory Technician & Instructor (SIWES)

- Installed and configured over 200 computers for a client-server Computer-Based Testing (CBT) laboratory.
- Supported system configuration, troubleshooting, and daily computer laboratory operations.
- Assisted with ICT instruction for senior secondary students and prepared curriculum-aligned instructional materials.
- Explored digitization opportunities for school management processes and provided examination-related administrative support.

SELECTED AI ENGINEERING PROJECTS

- **ResolveIQ (Zenith Bank Zecathon 6.0):** Designed and implemented a multi-agent transaction investigation platform. Engineered specialized AI agents (Complaint, Evidence, Root-Cause, and Resolution) to autonomously investigate and resolve financial discrepancies.
- **Amana Shield (AI4Elections 2026):** Developed an automated electoral scam and phishing link detection intelligence system. Integrated the WhatsApp Cloud API with a FastAPI backend and PostgreSQL database, utilizing RDAP/DNS parsing and structured LLM verification for procedural RAG against official electoral data.
- **ClassGPT-N Framework:** Designed an AI-powered tutoring framework focusing on Hausa-dominant learners in low-connectivity environments. Integrated N-ATLAS speech recognition for voice-first interactions and developed a curriculum-grounded Retrieval-Augmented Generation (RAG) component. Implemented a quantized Qwen2.5B model for local inference under practical hardware constraints. Built application frontends and backends with agent-agnostic student-state tracking and personalized bilingual feedback.

EDUCATION

Bachelor of Science in Computer Science Class of 2026
Federal University of Technology, Babura (FUTB), Nigeria
- **Cumulative Grade Point Average (CGPA):** 4.79/5.00

LEADERSHIP & COMMUNITY ENGAGEMENT

- **Founder & Convener, FUTB Genius Hub & SUCCESS FORGE:** Established student-focused technology and mentorship communities promoting STEM education, practical innovation, and academic rigor.
- **President, National Association of Computing Students (NACOS), FUTB:** Led departmental student representation and academic engagement.
- **Chief Press Secretary, Students' Representative Council (SRC), FUTB:** Supported institutional communication and public information.
- **Ameer II, Muslim Students' Society of Nigeria (MSSN), FUTB:** Supported religious, educational, and community development activities.
